Management Board's Report

The Managements Board has the pleasure of submitting its report for the year ended 31 December 2015.

Review of operations

The result for the year ended 31 December 2015 of the Bank is set out in the income statement on page 6.

Supervisory Board

For the period starting from 1 January 2015 until 23 September 2015, the Supervisory Board comprised of:

Aid Berbić Chairman
Ivica Knezović Member
Semir Fejzić Member
Ružica Ćurković Member
Ivica Musić Member
Sejfo Ušanović Member
Amir Karalić Member

For the period starting from 23 September 2015 until 23 December 2015, the Supervisory Board comprised of:

Željko Karačić Chairman
Fuad Kasumović Member
Zvonko Landeka Member
Ana Marija Boban Member
Asim Omanić Member
Amir Avdić Member
Mustafa Mujezinović Member

In order to ensure the regular course of the business of the Bank, the Bank Assembly appointed 6 members of the Supervisory Board, for the period not exceeding three months, at the 25th Session held on 14 January 2016 in Sarajevo. The first six, aforementioned members of the Supervisory Board, were confirmed, whereas the seventh member of the Supervisory Board will be appointed at the first next session of the Assembly, for the same period of time.

Management Board

During the course of 2015 and up to the date of this report, the Management Board comprised:

Salko Selman

Director and President of the Management Board

Borislav Trlin

Vice-president of the Management Board

Management Board's Report (continued)

Audit Committee

During the course of 2015 and up to the date of this report, the Audit Committee comprised:

Drago Novaković

Chairman

Fatima Obhodžaš

Vice-Chairwoman

Haladin Salihović

Member

Dželmina Huremović

Member

Suada Isaković

Member

On behalf of the Management Board

Salko Selman
President of the Management Board

Responsibilities of the Management and Supervisory Board for the preparation and approval of the annual financial statements

The Management Board of the Bank is required to prepare financial statements of the Bank for each financial year which give a true and fair view of the financial position of the Bank and of the results of its operations and cash flows, in accordance with applicable accounting standards and is responsible for maintaining proper accounting records to enable the preparation of such financial statements at any time. It has a general responsibility for taking such steps as are reasonably available to it to safeguard the assets of the Bank and to prevent and detect fraud and other irregularities.

The Management Board is responsible for selecting suitable accounting policies to conform with applicable accounting standards and then apply them consistently; making judgements and estimates that are reasonable and prudent; and preparing the financial statements on a going concern basis unless it is inappropriate to presume that the Bank will continue in business.

The Management Board is responsible for the submission to the Supervisory Board of its annual report on the Bank together with the annual financial statements, following which the Supervisory Board is required to approve the annual financial statements for submission to the General Assembly for adoption.

The financial statements set out on pages 6 to 48 were authorised by the Management Board on 10 March 2016 for issuing to the Supervisory Board and are signed below to signify this:

On behalf of the Management Board

Salko Selman President of the Management Board

Development Bank of the FBiH

Independent auditors' report to the owners of the Development Bank of the Federation of Bosnia and Herzegovina

We have audited the accompanying financial statements of the Development Bank of the Federation of Bosnia and Herzegovina ("the Bank"), which comprise the statement of financial position as at 31 December 2015, the statements of profit or loss and other comprehensive income, changes in equity and cash flows for the year then ended, and notes, comprising a summary of significant accounting policies and other explanatory information.

Management's Responsibility for the Financial Statements

Management is responsible for the preparation and fair presentation of these financial statements in accordance with International Financial Reporting Standards, and for such internal control as management determines is necessary to enable the preparation of financial statements that are free from material misstatement, whether due to fraud or error.

Auditors' Responsibility

Our responsibility is to express an opinion on these financial statements based on our audit. We conducted our audit in accordance with International Standards on Auditing. Those standards require that we comply with relevant ethical requirements and plan and perform the audit to obtain reasonable assurance whether the financial statements are free of material misstatement.

An audit involves performing procedures to obtain audit evidence about the amounts and disclosures in the financial statements. The procedures selected depend on our judgment, including the assessment of the risks of material misstatement of the financial statements, whether due to fraud or error. In making those risk assessments, we consider internal control relevant to the entity's preparation and fair presentation of the financial statements in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the entity's internal control. An audit also includes evaluating the appropriateness of accounting principles used and the reasonableness of accounting estimates made by management, as well as evaluating the overall presentation of the financial statements.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion.

This version of audit opinion is a translation from the original, which was prepared in the Bosnian language. In all matters of interpretation of information, views or opinions, the original language version of the report takes precedence over this translation.

Independent auditors' report to the owners of the Development Bank of the Federation of Bosnia and Herzegovina (continued)

Opinion

In our opinion, the financial statements give a true and fair view of the financial position of the Bank as at 31 December 2015, and of its financial performance and its cash flows for the year then ended in accordance with International Financial Reporting Standards.

Notes to financial statements

1 General

The Development Bank of the Federation of Bosnia and Herzegovina (hereafter referred to as "the Bank") was established by the Law on the Development Bank of the Federation of Bosnia and Herzegovina ("Official Gazette of Federation of Bosnia and Herzegovina", No. 37/08). The Bank is headquartered in Igmanska 1, Sarajevo. The Bank is in 100% ownership of the Federation of Bosnia and Herzegovina.

In compliance with the Law on the Development Bank and the Statute of the Bank, bodies of the Bank are: the Assembly (consisting of the Government of the FBiH), the Supervisory Board, the Management Board and the Audit Committee.

As of 31 December 2015 the Bank had branch offices in Mostar, Bihać, Zenica, Orašje, Tuzla and Livno.

The goals of the Bank are encouragement of economic development and overall social development and the encouragement of sustainable growth on the territory of the Federation of Bosnia and Herzegovina, relating to the financial and general social goals defined by the Law.

Corporate loan and guarantee approvals are the key activities of the Bank either directly or through other banks, in order to support the local economy, regional development and employment. The Bank performs credit operations in the name and on behalf of the Bank (from capital, collected deposits and borrowings), as well as in the name and on behalf of the Federation of BiH, on which behalf it manages its domestic and foreign funds aimed for development projects, as well as receives cash deposits and takes loans, as a function of financing development projects.

2 Basis of preparation

a) Statement of compliance

These financial statements have been prepared in accordance with International Financial Reporting Standards ("IFRS") issued by the International Accounting Standards Board.

The Bank's financial statements were authorized for issue by the Management Board on 10 March 2016 for submission to the Supervisory Board.

b) Basis of measurement

These financial statements have been prepared on the historical or amortised cost basis.

c) Functional and presentation currency

The financial statements are presented in Convertible Marks ("BAM"), which is the functional currency of the Bank.

The Central Bank of Bosnia and Herzegovina ("CBBiH" or "Central Bank") implemented a currency board arrangement aligning BAM to EURO at an exchange rate of EUR 1: BAM 1.95583 throughout 2014 and 2015. This is expected to continue in the foreseeable future.

d) Use of estimates and judgements

The preparation of financial statements requires management to make judgements, estimates and assumptions that affect the application of policies and reported amounts of assets, liabilities, revenues and expenses. Actual results may differ from these estimates.

Estimates and underlying assumptions are reviewed on an ongoing basis. Revisions to accounting estimates are recognised in the period in which the estimate is revised if the revision affects only that period or in the period of revision and future periods if the revision affects both current and future periods.

Information on areas with significant uncertainty in the estimates and critical judgements in applying accounting policies that have the most significant effect on the amounts recognised in these financial statements are disclosed in Note 4.

3 Significant accounting policies

The accounting policies set out below have been consistently applied for all periods presented in these financial statements.

a) Foreign currency transactions

Transactions in foreign currencies are translated into the functional currency using the exchange rates prevailing at the dates of the transactions. Foreign exchange profits and losses resulting from the settlement of such transactions and from the translation at year-end exchange rates of monetary assets and liabilities denominated in foreign currencies are recognised in the income statement. Non-monetary assets and items that are measured in terms of historical cost in foreign currency are translated using the exchange rate at the date of the transaction and are not retranslated at the reporting date.

b) Interest income and expense

Interest income and expense are recognised in the income statement as they accrue using the effective interest rate method. Effective interest rate is the rate that discounts estimated future cash flows of financial assets or liabilities over the life of financial instrument (or, if appropriate, a shorter period) to its net carrying value. In the calculation of effective interest rates the Bank estimates future cash flows considering all contractual terms, but not future credit losses.

Calculation of the effective interest rate includes all paid or received transaction costs, fees and points, which are an integral part of the effective interest rate. Transaction costs include all incremental costs incurred directly in connection with the issuance or acquisition of financial assets or financial liabilities.

Interest income and expense recognised in the income statement include interest on financial assets and financial liabilities that are measured at amortised cost calculated using the effective interest rate method.

c) Fee and commission income and expenses

Fee and commission income and expenses that are integral part of the effective interest rate on a financial asset or liability are included in the measurement of the effective interest rate.

Fee and commission income and expenses, reported as such, mainly comprise of fees related to agency activities, the issuance of guarantees and letters of credit and other services and are recognised in the income statement upon performance of the relevant service.

d) Lease payments

Payments made under operating leases are recognised in profit or loss on a straight-line basis over the term of the lease.

e) Income tax

According to Article 32 of the Law on Development Bank of the Federation of Bosnia and Herzegovina ("Official Gazette of Federation of Bosnia and Herzegovina, No. 37/08), the Bank is not subject to corporate profit tax.

f) Financial instruments

Recognition

Loans and receivables, and other financial liabilities are recognised when advanced to borrowers or received from lenders (settlement date).

- 3 Significant accounting policies (continued)
- f) Financial instruments (continued)

Classification

The Bank classifies its financial instruments in the following categories: loans and receivables and other financial liabilities. The classification depends on the purpose for which the financial assets and liabilities were acquired. The Management determines the classification of financial assets and liabilities upon initial recognition and re-evaluates this classification at each reporting date.

a) Loans and receivables

Loans and receivables are non-derivative financial assets with fixed or determinable payments that are not quoted in an active market. Loans and receivables arise when the Bank provides money to a debtor with no intention of trading with the receivable and include placements with and loans to other banks, loans to customers and balances with the Central Bank.

b) Other financial liabilities

Other financial liabilities comprise of all other financial liabilities, including current and deposit accounts and borrowings.

Initial and subsequent measurement

Loans and receivables and other financial liabilities are initially recognized at fair value. Loans and receivables and other financial liabilities are subsequently measured at amortized cost, using the effective interest rate method, less any impairment.

Derecognition

The Bank derecognizes financial assets (in full or in part) when the contractual rights to receive cash flows from the financial instrument have expired or when it loses control over the contractual rights on those financial assets. This occurs when the Bank transfers substantially all the risks and rewards of ownership to another business entity or when the rights are realized, surrendered or have expired.

The Bank derecognizes financial liabilities only when the financial liability ceases to exist, i.e. when it is discharged, cancelled or has expired. If the terms of a financial liability change, the Bank will cease recognizing that liability and will instantaneously recognize a new financial liability, with new terms and conditions.

Identification and measurement of impairment of financial assets

The Bank assesses at each reporting date whether there is any objective evidence that a financial asset or a group of financial assets is impaired. A financial asset or a group of financial assets is impaired if, and only if, there is objective evidence of impairment as a result of one or more events that has occurred after the initial recognition of the asset (an incurred 'loss event') and that loss event (or events) has (or have) an impact on the estimated future cash flows of the financial asset or the group of financial assets that can be reliably estimated. Objective evidence of impairment may include indications that the borrower or a group of borrowers is experiencing significant financial difficulty, default or delinquency in interest or principal payments, the probability that they will enter bankruptcy or other financial reorganisation and where observable data indicate that there is a measurable decrease in the estimated future cash flows from a group of financial assets since the initial recognition of those assets, although the decrease cannot yet be identified for the individual financial assets in the group.

For financial assets carried at amortised cost, the Bank first assesses whether objective evidence of impairment exists individually or collectively. Those individual assets which are not identified as impaired are subsequently included in the basis for collective impairment assessment. For the purpose of a collective evaluation of impairment, financial assets are grouped on the basis of similar credit risk characteristics.

Financial statements for the year ended 31 December 2015

Notes to financial statements (continued)

- 3 Significant accounting policies (continued)
- f) Financial instruments (continued)

Identification and measurement of impairment of financial assets (continued)

If there is an objective evidence that an impairment loss has been incurred, the amount of the loss is measured as the difference between the assets' carrying amount and the present value of estimated future cash flows (excluding future expected credit losses that have not yet been incurred) discounted at the original effective interest rate of financial assets valid at the time the asset become impaired. The carrying amount of the asset is reduced through the use of an allowance account and the amount of the loss is recognised in the income statement.

For individually significant loans, the need for, and amount of impairment allowance is determined based on an assessment which includes the sustainability of the counterparty's business plan, its ability to improve performance once a financial difficulty has arisen, the availability of working capital and other financial support, the realisable value of collateral, and the timing of the expected cash flows.

Allowances are assessed collectively for losses on loans to customers where there is no objective evidence of individual impairment. For the purpose of collective evaluation of impairment the Bank uses statistical models and historical data on the probability of occurrences that cause impairment, the time required to recover and the total loss incurred, adjusted for management's judgement as to whether the current economic and credit conditions are such that it is likely that the actual losses will be higher or lower of those calculated by historical modelling. The Bank regularly reviews the loss rates and the expected rates of recovery at each reporting date, to ensure accurate reporting.

If in a subsequent period, the amount of the impairment loss decreases and the decrease can be related objectively to an event occurring after the impairment was recognised (such as an improvement in the debtor's credit rating), the previously recognised impairment loss is reversed by adjusting the allowance account. The amount of reversal is recognised in the income statement.

When a loan is uncollectible, it is written off against the related impairment allowance account. Such loans are written off after all the necessary procedures have been completed and the amount of the loss has been determined. Subsequent recoveries of amounts previously written off are recognised as a reversal of impairment losses in the income statement.

The Bank also calculates provisions in accordance with the relevant regulations of the Banking Agency of the Federation of Bosnia and Herzegovina ("the Agency" or "FBA"). In accordance with these regulations, the relevant placements are classified into appropriate risk groups, depending on the past due days, the financial position of the borrower and collateral; and are provided for at prescribed rates. A general provision is also calculated in accordance with these regulations at a rate of 2% on exposure not specifically impaired.

Provisions calculated in the manner described in the previous paragraph ("FBA reserves") are not recognized in these financial statements of the Bank. If the impairment for potential losses calculated in accordance with the regulations of the Agency is greater the impairment calculated in accordance with the requirements of IFRS, this difference is presented as adjustments in the calculation of capital adequacy.

Fair values of financial assets and liabilities

The fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date in the principal or, in its absence, the most advantageous market to which the Bank has access. The fair value of a liability expresses its risk of non-performance.

Where available, fair value is measured using the quoted price in an active market. The market is considered active if the transaction for asset or liability occur with sufficient frequency and to the extent sufficient to provide information about prices on a regular basis (Level 1 fair value hierarchy).

Financial statements for the year ended 31 December 2015

Notes to financial statements (continued)

- 3 Significant accounting policies (continued)
- f) Financial instruments (continued)

Fair values of financial assets and liabilities (continued)

In circumstances where the quoted market prices are not readily available, the Bank then uses valuation techniques that maximize the use of observable inputs (Level 2 and Level 3 fair value hierarchy) and minimize the use of unavailable input data. Selected valuation techniques include all factors that market participants would take into account when determining the price of the transaction.

Analysis of financial instruments that are measured subsequent to initial recognition at fair value are grouped into Levels 1 to 3 as follows:

- Level 1 fair value derived from quoted prices in active markets
- Level 2 fair value measurements derived from inputs other than quoted prices included in level 1;
- Level 3 fair value derived from valuation techniques that are not based on observable market data.

Specific financial instruments

Cash and cash equivalents

For the purpose of reporting cash flows, cash and cash equivalents comprise of cash, balances with the Central Bank and current accounts with other banks.

Cash and cash equivalents exclude the compulsory minimum reserve with the Central Bank as these funds are not available for the Bank's day-to-day operations. The compulsory minimum reserve with the Central Bank is a required reserve to be held by all commercial banks licensed in Bosnia and Herzegovina.

Obligatory reserve with the Central Bank

Obligatory reserve with the Central Bank is classified as loans and receivables and measured at amortized cost less impairment losses.

Loans and advances

Loans and advances to banks and customers are presented at amortised cost net of impairment allowances to reflect the estimated recoverable amounts.

Borrowings

Interest-bearing borrowings are classified as other financial liabilities and are recognised initially at fair value, less attributable transaction costs. Subsequent to initial recognition, these are stated at amortised cost with any difference between proceeds (net of transaction costs) and redemption value being recognised in the income statement over the period of the borrowings using the effective interest rate method.

Current accounts and deposits from customers

Current accounts and deposits are classified as other liabilities and are initially measured at fair value plus transaction costs and subsequently stated at their amortised cost using the effective interest method.

3 Significant accounting policies (continued)

g) Property and equipment

Property and equipment are stated at historical cost less accumulated depreciation and impairment losses. The cost includes expenditures that are directly attributable to the acquisition of the asset. Subsequent cost is included in net book value or is accounted for as separate assets only if it is probable that the future economic benefits embodied within the part will flow to the Bank and its cost can be measured reliably. The costs of day-to-day repairs and maintenance are recognised in the income statement as incurred.

Depreciation is provided on all property and equipment except for land and assets in the course of construction on a straight-line basis at prescribed rates designed to write off the cost over the estimated useful lives of the assets. The depreciation rates used by the Bank are as follows:

Buildings	33.3 years
Office equipment	3-5 years
Vehicles	5 years
Leasehold improvements	5 years

Depreciation method and useful lives are reviewed, and adjusted if appropriate, at each reporting date.

Gains and losses on disposal are determined by comparing proceeds with the carrying amount, and are included in the income statement as other income or operating expense.

h) Intangible assets

Intangible assets are stated at historical cost less accumulated amortisation and impairment losses. The cost includes all expenditure that is directly attributable to the acquisition of the items.

Amortization is provided on all intangible assets except assets in the course of construction on a straight line basis at prescribed rates designed to write off the cost over the estimated useful lives of the assets. The following estimated useful lives are used:

Software 5 years

Amortization method and useful lives are reassessed, and adjusted if appropriate, at each reporting date.

Impairment of non-financial assets

The carrying amounts of the Bank's non-financial assets are reviewed at each reporting date to determine whether there is any indication of impairment. If any such indication exists, the asset's recoverable amount is estimated. An impairment loss is recognised whenever the carrying amount of an asset or its cashgenerating unit exceeds its recoverable amount, impairment losses are recognised in the income statement.

The recoverable amount of other assets is the greater of their value in use and fair value less cost to sell. In assessing value in use, the estimated future cash flows are discounted to their present value using a pre-tax discount rate that reflects current market assessments of the time value of money and the risks specific to the asset. For an asset that does not generate largely independent cash inflows, the recoverable amount is determined for the cash-generating unit to which the asset belongs.

An impairment loss is reversed if there has been a change in the estimates used to determine the recoverable amount. An impairment loss is reversed only to the extent that the asset's carrying amount does not exceed the carrying amount that would have been determined, net of depreciation or amortisation, if no impairment loss had been recognised.

Financial statements for the year ended 31 December 2015

Notes to financial statements (continued)

3 Significant accounting policies (continued)

j) Employee benefits

Short-term benefits

On behalf of its employees, the Bank pays pension and health insurance which is calculated on the gross salary paid, as well as tax on salaries which are calculated on the net salary paid. The Bank pays the above contributions into the state pension and health funds according to statutory rates during the course of the year. In addition, meal allowances, transport allowances and vacation bonuses are paid in accordance with local legislation. These expenses are recorded in the income statement in the period in which the salary expense is incurred.

Obligations for contributions to defined contribution pension plans are recognised as an expense in the income statement as incurred.

Long-term benefits: retirement severance payments

According to the local legislation the Bank pays to its employees retirement severance benefits upon retirement in an amount of six employee's salaries received in the last six months or six average salaries at the Federation of BiH level in the last six months, depending on what is more favourable for the employee.

The obligation and costs of these benefits are determined by using a projected unit credit method. The projected unit credit method considers each period of service as giving rise to an additional unit of benefit entitlement and measures each unit separately to build up the final obligation. The obligation is measured at the present value of estimated future cash flows using a discount rate that is similar to the estimated interest rate on government bonds.

k) Provisions

Provisions are recognised when the Bank has a present legal or constructive obligation as a result of past events, it is probable that an outflow of resources embodying economic benefits will be required to settle the obligation, and a reliable estimate of the amount of the obligation can be made, or as required by law in the case of provisions for unidentified impairment of off-balance-sheet credit risk exposures.

Provisions for liabilities and charges are maintained at the level that the Bank's management considers sufficient for absorption of incurred losses. The management determines the sufficiency of provisions on the basis of insight into specific items, current economic circumstances, risk characteristics of certain transaction categories, as well as other relevant factors.

Provisions are released only for such expenditure in respect of which provisions are recognised at inception. If the outflow of economic benefits to settle the obligations is no longer probable, the provision is reversed.

Registered capital

Registered capital consists of 100% share of the Federation of BiH.

Financial statements for the year ended 31 December 2015

Notes to financial statements (continued)

3 Significant accounting policies (continued)

I) Registered capital (continued)

Regulatory reserve for credit losses

The regulatory reserve for credit losses represents the surplus of impairment allowances calculated in accordance with regulations as prescribed by the Agency over impairment allowances recognised in accordance with IFRS. The reserve is presented directly within equity (as a non-distributable reserve) and until 2012 any increase of the surplus was covered by transfers from retained earnings, after approval by shareholders.

Prior to 2012, the need for transfers from retained earnings to an earmarked reserve within equity (regulatory reserve for credit losses) was calculated for the whole credit-risk portfolio on a net basis, thereby taking into account both instances where application of Agency regulations would have resulted in a higher provision and instances where the application of Agency regulations would have resulted in a lower provision. However, from 2012, banks are required to calculate the requirement for regulatory reserves for credit losses taking into account only instances where higher provisions would have resulted from the application of the Agency rules. Retroactive application of this change in Agency rules is not required.

Based on the Decision issued by the Agency in February 2013 any increase of the surplus of regulatory provisions no longer needs to be presented as a reserve movement within equity but will be exclusively computed as a deduction of regulatory capital for the purpose of capital adequacy calculations. Therefore, the reserve shown in the financial statements as at and for the year ended 31 December 2012 remained unchanged until 31 December 2015.

m) Off-balance sheet commitments and contingent liabilities

In the ordinary course of business, the Bank enters into credit-related commitments which are recorded in off-balance-sheet accounts and primarily comprise of guarantees, letters of credit and undrawn loan commitments. Such financial commitments are recorded in the Bank's statement of financial position if and when they become payable.

n) Funds managed for and on behalf of third parties

The Bank manages significant funds for and on behalf of the Government of the FBiH (Ministry of Finance, Ministry of Development, Entrepreneurship and Craft, Ministry of Agriculture, Water Management and Forestry, Ministry of Displaced Persons and Refugees, Ministry of Environment and Tourism and Ministry of Energy, Mining and Industry) and the Federal Employment Agency. Income and expenses from such operations are charged to the principal and the Bank does not bear any liabilities and risks. For these services, the Bank charges fees. For details refer to Note 24.

- 3 Significant accounting policies (continued)
- Standards, interpretations and amendments to published standards that are not yet effective and were not used in preparation of these financial statements

A number of new standards, amendments to standards and interpretations issued by the International Accounting Standards Board ("IASB") and International Financial Reporting Interpretations Committee ("IFRIC") are not yet effective for annual periods beginning 1 January 2015, and have not been applied in preparing these financial statements.

• IFRS 9 (Financial Instruments) was published in July 2014, replacing the existing provisions of IAS 39 Financial Instruments: Recognition and Measurement. IFRS 9 includes revised guidance on the classification and measurement of financial instruments, including a new model of the expected credit loss for calculating impairment of financial assets, and new general requirements for hedge accounting. It also elaborates the requirements for the recognition and derecognition of financial instruments from IAS 39. IFRS 9 is effective for annual periods beginning on 1 or after 1 January 2018, with early adoption permitted.

The Bank assesses the potential impact of the application of IFRS 9 on its financial statements. Given the nature of the Bank, it is expected that this standard will have a pervasive impact on the Bank's financial statements. In particular, it is expected that the calculation of the impairment of financial instruments based on the expected credit loss will result in an increase in the overall level of impairment.

IFRS 15 (Revenues from contracts with customers) establishes a comprehensive framework to determine
whether, how and when to recognize revenue. It replaces the existing guidelines on the recognition of
revenue, including IAS 18 Revenue, IAS 11 Accounting for construction contracts and IFRIC 13
Customer Loyalty Programmes. IFRS 15 is effective for annual reporting periods beginning on 1 January
2017, with early adoption permitted.

The Bank assesses the possible impact of adoption of IFRS 15 on its financial statements.

The following new or revised standards are not expected to have a significant impact on the Bank's financial statements.

- Plans for defined benefit: Employees' contributions (amendment to IAS 19)
- The annual improvements to IFRSs Cycle 2010-2012
- The annual improvements to IFRSs Cycle 2011-2013
- IFRS 14 Accounts regulatory prepayments
- Accounting for the acquisition of interests in joint arrangements (amendments to IFRS 11)
- Clarification of the eligible methods of depreciation (amendments to IAS 16 and IAS 38)
- Agriculture: Growing crops (amendments to IAS 16 and IAS 41)
- The equity method in the separate financial statements (amendment IAS 27)
- The sale or transfer of assets between investors and its associated entities or joint ventures (amendment of IFRS 10 and IAS 28)
- The annual improvements to IFRSs Cycle 2012 to 2014 various standards.
- Investment Entities: Applying the Consolidation Exception (amendments to IFRS 10, IFRS 12 and IFRS 28)
- Disclosure Initiative (amendments to IAS 1)

4 Critical accounting judgements and key sources of estimation uncertainty

The Bank makes estimates and assumptions about uncertain events, including estimates and assumptions about the future. Such accounting assumptions and estimates are regularly evaluated and are based on historical experience and other factors such as the expected flow of future events that can be reasonably assumed in existing circumstances, but nevertheless necessarily represent sources of estimation uncertainty. The estimation of impairment losses in the Bank's credit risk portfolio represents the major source of estimation uncertainty. This and other key sources of estimation uncertainty, that have a significant risk of causing a possible material adjustment to the carrying amounts of assets and liabilities within the next financial year, are described below.

(a) Impairment losses on loans and receivables and provisions for off-balance-sheet exposure

The Bank monitors the creditworthiness of its customers on an ongoing basis. The need for impairment of the Bank's on and off-balance sheet exposure to credit risk is assessed on a monthly basis.

Impairment losses are made mainly against the carrying value of loans to banks and customers (as disclosed in Notes 14 and 15) and as provisions for liabilities and charges arising from off-balance exposure to customers, mainly in the form of guarantees and letters of credit (as disclosed in Note 20).

The Bank estimates impairment losses in cases where it judges that the observable data indicates the likelihood of a measurable decrease in the estimated future cash flows of the asset or portfolio of assets. Such evidence includes delinquency in payments or other indications of financial difficulty of borrowers and adverse changes in the economic conditions in which borrowers operate or in the value or enforceability of security, where these changes can be correlated with defaults.

Summary of impairment allowances and provisions	Note	31 December 2015 BAM '000	31 December 2014 BAM '000
Impairment allowances for statement of financial position exposures, including IBNR and other	14, 15,16	28,710	23,593
Provisions for off-balance sheet exposure	20	356	260
		29,066	23,853

As at 31 December 2015 and 31 December 2014, the gross value of impaired loans and receivables (non-performing loans – NPL) and the rate of impairment loss recognized were as follows:

31 December 2015

BAM '000	Loans to banks	Loans to customers	Total	Loans to banks	Loans to customers	Total
Gross exposure	1,534	36,343	37,877	1,534	30,671	32,205
Impairment allowance	(1,534)	(17,501)	(19,035)	(1,534)	(12,908)	(14,442)
Impairment rate	100%	48%	50%	100%	42%	45%

In addition to identified losses on impaired loans, as described above, the Bank also recognizes impairment losses which are known to exist at the reporting date, but which have not yet been specifically identified ("IBNR"). The amount of IBNR as at 31 December 2015 amounted to BAM 8,518 thousand (2014: BAM 9,150 thousand) or 4.0% (2014: 4.3%) of loans and receivables.

31 December 2014

4 Critical accounting judgements and key sources of estimation uncertainty

(b) Regulatory requirements

The Agency is entitled to carry out regulatory inspections of the Bank's operations and to request changes to the carrying values of assets and liabilities, in accordance with the underlying regulations.

In addition to impairment allowances calculated and recognized in accordance with IFRS, the Bank also calculates impairment losses in accordance with Agency regulations for capital adequacy calculation purposes and regulatory reserves for credit losses.

The following table summarizes impairment allowances calculated in accordance with the Agency regulations. Regulatory provisions as of 31 December 2015 are calculated in accordance with the new methodology, as explained in Note 3 (m):

Summary of impairment allowances	31 December 2015	31 December 2014
	BAM '000	BAM '000
Provisions for balance-sheet exposure (Agency) Provisions for off-balance-sheet exposure	37,667	34,963
(Agency)	481	408
	38,148	35,371
Impairment allowances under IFRS	29,066	23,854
Negative difference between provisions for balance-sheet exposure (Agency) and impairment allowance in accordance with IFRS	2,974	3,549
Excess at period end	12,056	15,067

Prior to 2012, any increase in allowance in accordance with the Agency regulations over amounts recognized under IFRS were required to be transferred to regulatory reserves from profit or retained earnings, upon the decision of the General Assembly. However, as explained in Note 3 (f), based on the new Decision issued by the Agency in February 2013 any further shortfall in regulatory provisions will be adjusted as a deduction of regulatory capital in the capital adequacy calculation without any transfer of this shortfall from retained earnings to regulatory reserves for credit losses within equity.

As presented in the above table, total Agency provisions exceeded provisions recognized under IFRS by BAM 12,056 thousand as at 31 December 2015 (31 December 2014: BAM 15,067 thousand). Out of this amount, BAM 8,057 thousand has been recognized as a regulatory reserve for credit losses within equity as at 31 December 2015 (31 December 2014: BAM 8,057 thousand). The remaining amount of BAM 3,999 thousand, which represents the current year shortfall, in line with the new Agency regulation, as explained above, will not be transferred to the regulatory reserves for credit losses, but will be recorded as a reduction of regulatory capital.

4 Critical accounting judgements and key sources of estimation uncertainty (continued)

(c) Litigation

The Bank performs individual assessment of all court cases and on that basis determines the amount of provisions.

As indicated in Note 26, the Bank provided BAM 38 thousand, which is the amount that the Management considered sufficient. Since the assessment is made for each case separately, it is not practical to estimate the financial effect of changes in assumptions based on which Management assesses the need for provisions on the reporting date.

5 Interest income

24 Funds managed for and on behalf of third parties

The Bank manages significant funds for and on behalf of the Government of the FBiH (Ministry of Finance, Ministry of Development, Entrepreneurship and Craft, Ministry of Agriculture, Water Management and Forestry, Ministry of Displaced Persons and Refugees, Ministry of Environment and Tourism and Ministry of Energy, Mining and Industry) with the purpose of financing reconstruction projects and Federal Employment Agency projects aimed at financing employment incentives and upkeep of employment. Those assets are held separately from other Bank assets. The bank calculates and charges a fee for those services in accordance with a contract signed with the provider of assets.

25 Financial risk management

The Bank's activities expose it to a variety of financial risks; credit risk, liquidity risk, market risk and operating risk. Market risk includes currency risk, interest rate risk and other price risks.

The Management Board has overall responsibility for the establishment and oversight of the Bank's risk management framework.

Risk management is carried out by the Bank's departments in charge for individual risks under policies suggested by the Management Board, and approved by the Supervisory Board.

Risk steering and risk controlling processes are adjusted in a timely manner to reflect changes in the market environment.

This Note aims to provide information on Bank's exposure to all of the above stated risks, and its goals, policies and procedures aimed to measure and manage the risks, as well as to manage capital of the Bank.

25.1. Credit risk

The Bank is exposed to credit risk which is the risk that a counterparty will not be able to pay amounts in full when due, which will result in the Bank's financial loss.

The credit risk is the most significant risk which the Bank faces in the course of its operations, and it is analyzed and monitored on an individual loan and client basis, as well as in relation to the whole portfolio.

To manage the level of credit risk, the Bank only deals with counterparties which are creditworthy and, if possible, obtains sufficient collateral.

The choice of appropriate securities of the credit exposures depends on:

- Creditworthiness of the client
- Risk of the financed project
- Estimated value of collateral.

In order to minimise credit risk, the Bank applies the Decision on definition, evaluation and treatment of collateral for loan and potential placement security, and secures its credit exposures by taking one or more of the following instruments:

- cash;
- bank and corporate guarantees;
- bills of exchange and unconditional guarantees, issued by the responsible authorities as defined in the Decision;
- mortgages over properties;
- pledge over business assets such as equipment, inventory and receivables.

25 Financial risk management (continued)

25.1.Credit risk (continued)

The maximum exposure to credit risk without taking into account any collateral or other increased value

	-	-		
	266,196	14,320	280,516	233,321

For statement of financial position items, the above exposures are based on net carrying amounts as shown in the statement of financial position. The table above represents the maximum credit risk exposure as at 31 December 2015 and 31 December 2014, without taking account of any collateral or other increase in value.

Estimated value of property that serves as collateral is determined by the value of the initial evaluation by independent evaluators / real estate agents at the time of loan approval, reduced by a fixed percentage, depending on the type of collateral and reduced proportionately to the extent that it also serves as collateral security for other credit exposure. In order to verify the adequacy of the impairment, the re-valuation of collateral is done in accordance with the principles and rules of the collateral management system, taking into consideration the volatility of the value of the collateral and the time required for its implementation, under the influence of local and global market conditions. Guarantees and promissory notes do not have the declared value in the table, although they are usually required as collateral.

During the year, the Bank, in positions of non-financial assets, has items acquired by taking possession of collateral that are used as collateral in credit exposure in the case of non-repayment of the debt by the debtor. This process of acquiring is mainly related to real estate, equipment, vehicles. The acquired assets are shown as such in the statement of financial position of the Bank at the time when the conditions are met for its acquisition in accordance with IFRS and local regulations. The Bank's policy is to sell the assets acquired in this way, and during the time of ownership of these assets until they are sold to third parties, the assets can be temporarily used for the operations of the Bank or to rent to third parties. The acquired assets are presented in Note 16.

25 Financial risk management (continued)

25.1. Credit risk (continued)

25.1.1 Credit risk management and policy provisions and impairment

Restructured loans

During the year, the Bank carried out the restructuring of certain loans to customers, with the aim of achieving better recoverability. Restructuring is usually done after the initial deterioration of the financial situation of the client or for the purpose of preventing further deterioration. After the restructuring, loans continue to be considered as performing loans until the appearance of clear signs of default. Wherever possible, the Bank's position improves by acquisition of additional collateral.

For the purpose of credit monitoring and credit risk management, the Bank's credit portfolio is divided into the following groups:

- Performing loans unimpaired loans (including restructured loans)
- · Past due loans that are not recognized as impaired
- · Non-performing loans impaired loans.

Analysis of the credit portfolio in accordance with the aforementioned categories is as follows:

	31 December 2015	31 December 2014
Banks		
Loans to customers that are neither past due nor impaired	47	161
Past due but not impaired loans	12	=
Non-performing loans (impaired loans)	1,534	1,534

Specific impairment allowances	(19,035)	(14,442)
Net exposure	212,722	211,858

a) Loans to customers that are neither past due nor impaired

The quality of the portfolio of loans to customers that are neither past due nor impaired can be assessed through the internal standard monitoring system. Loans to customers are regularly monitored and systematically reviewed in order to identify any irregularities or warning signs. These loans are subject to constant monitoring with the aim of taking timely action based on improvement / deterioration of client risk profile. An overview of gross exposure of loans to customers that are neither past due nor impaired according to the type of loan is as follows:

	Banks	Coporates	Individuals	Total
31 December 2015				
Standard monitoring	47	172,417	1,400	173,864
	-			
31 December 2014

				-

25 Financial risk management (continued)

25.1 Credit risk (continued)

25.1.1 Credit risk management and policy provisions and impairment (continued)

b) Past due but not impaired loans

Loans to and receivables from customers less than 90 days overdue are not considered as impaired, unless other information is available to indicate the contrary. The gross amount of loans to and receivables from customers that were past due but not impaired was as follows:

	Past due days						
	Gross	Until 30 days	31 - 60 days	61 - 90 days	Over 90 days		
31 December 2015							
Banks	-	-	=	-

25 Financial risk management (continued)

25.2. Liquidity risk

Liquidity risk arises in the funding of the Bank's activities and in the management of positions. Treating liquidity risk, the Bank consolidates its operations in accordance with the relevant decisions and internal policies aimed at maintenance of liquidity reserves, harmonization of assets and liabilities indicators and liquidity limits.

The Bank has limited access to sources of finance. Funds are raised through a limited number of instruments including deposits of FBiH Government and the Federal Employment Service, deposits of legal entities, borrowings and equity. This limits the flexibility of financing and represents a reliance on deposits and payments of capital by the Government of the Federation.

The Bank strives to maintain a balance between continuity of funding and flexibility through the use of liabilities with different maturities. The Bank continually assesses liquidity risk by identifying and monitoring changes in funding required to meet business goals. Furthermore, the Bank holds a portfolio of liquid assets as part of its liquidity risk management strategy.

The table below shows the remaining contractual maturity of the Bank's assets and liabilities:

25.3 Market risk

The Bank is exposed to market risks, which is the risk that the fair value or future cash flows of a financial instrument will fluctuate because of changes in market prices. Market risks arise from open positions in interest rate, foreign currency and equity products, all of which are exposed to general and specific market movements and changes in the level of volatility of market rates or prices such as interest rates, credit spreads, foreign exchange rates and equity prices.

The Management Board sets limits and guidelines for monitoring and mitigating of market risks, which is regularly monitored.

25.3.1 Foreign exchange risk

Exposure to currency risk arises from credit, deposit-taking and trading activities and is controlled on a daily basis in accordance with legal and internal limits for each currency, as well as in total amounts for assets and liabilities denominated in or linked to foreign currencies.

Treasury department is responsible for daily management of the Bank's currency position in accordance with legal and internal regulations.

Foreign currency sensitivity analysis

The Bank is mainly exposed to EUR and USD. Since Convertible Mark (BAM) is pegged to EUR, the Bank is not exposed to risk of change in the exchange rate of EUR.

The following table shows the Bank's sensitivity to a 10% increase and decrease in BAM against the USD. 10% is the sensitivity rate used for reporting foreign currency risk internally to key management personnel and represents management's assessment of the reasonably possible changes in foreign exchange rates. The analysis includes only outstanding foreign currency denominated monetary items and represent an adjustment to their value at period end for an USD exchange rate movement of 10%. The sensitivity analysis includes external loans that are denominated in a currency other than the currency of the lender or the borrower. A positive number below indicates an increase in profit when BAM strengthens by 10% against the USD. For a 10% weakening of the BAM against the USD, there would be an equal but opposite impact on the profit.

USD impact

	2015	2014
Loss	(9)	(10)

25 Financial risk management (continued)

25.3 Market risk (continued)

25.3.2 Interest rate risk

The bank is subject to the risk of interest rate changes, the extent to which interest-bearing assets and liabilities mature or change rates at different times or in different amounts.

The majority of loans to legal entities and individuals are initially contracted at fixed interest rates. These financial instruments are classified as instruments with fixed interest rates, and other such instruments with variable interest rates. The Bank does not pay interest on deposits, except for part of the guarantee deposit of the Government of FBiH BAM 5,000 thousand (1% per annum). Decision on establishing and changes in interest rates are made by the Supervisory Board at the proposal of the Board.

Interest rate sensitivity of assets and liabilities

The table below summarizes the Bank's exposure to interest rate risk at the end of the year. Assets and liabilities are presented in the table at book value, and are categorized by the earlier contractual maturity date. Those assets and liabilities that are not applicable interest rates are classified as "Non-interest bearing".

25.4 The estimation of fair values of financial assets and liabilities

Fair value is the amount for which an asset could be exchanged, or a liability settled, between knowledgeable, willing parties in an arm's length conditions. Where available, fair values are based on market prices. However, for a significant part of the Bank's financial instruments, there are no readily available market prices. In conditions when market prices are not readily available, fair value is estimated using discounted cash flows or other appropriate techniques pricing. Changes in the accompanying assumptions, including discount rates and estimated future cash flows, significantly affect the estimates. Therefore, the calculated fair market estimates may not be realized in the sale of financial instruments in the current period, particularly taking into account the impact of the global financial crisis and the lack of a liquid market in Bosnia and Herzegovina.

Cash and cash equivalents

The carrying values of cash and balances with banks are generally deemed to approximate their fair values.

Loans to customers

Given the specificity of the Bank, a large amount of the total loan portfolio carries a fixed interest rate and long-term maturity and an interest rate below the market of the interest rate. It is not practicable to calculate the fair value of loans to customers.

Deposits from customers

For demand deposits and deposits with no defined maturities, fair value is the amount payable on demand at the statement of financial position date. The estimated fair value of fixed-maturity deposits is based on discounted cash flows using rates currently offered for deposits of similar remaining maturities. It is not practicable to calculate the fair value of fixed-maturity deposits.

Borrowings

Bank borrowings are interest-free or carry a low fixed interest rate. The fair value of borrowings with fixed interest rate is determined using a discounted future cash flows using interest rates currently offered for loans with similar terms and conditions to borrowers with similar credit worthiness. It is not practicable to calculate the fair value of borrowings.

25.5 Capital management

The Bank's objectives when managing capital, which is a broader concept of "share capital" of the statement of financial position, are:

- To comply with the capital requirements set by the regulators of the banking market in the domestic environment;
- To maintain a strong capital base to support business development.

The Bank's management regularly monitors capital adequacy and the use of regulatory capital on the basis of appropriate techniques that are based on the regulations of the Banking Agency of the Federation of Bosnia and Herzegovina.

The Bank as at 31 December 2015 was in line with all regulatory capital requirements and in accordance with local regulations achieved a capital adequacy ratio of 81.5% (31 December 2014: 75.4%).

25 Financial risk management (continued)

25.5 Capital management (continued)

The Bank's regulatory capital for monitoring adequacy according to the Agency's methodology consists of:

- Tier 1 capital or Core Capital: share capital (net of the carrying value of treasury shares), share premium, retained earnings and reserves created by appropriations of retained earnings; negative revaluation reserves arising from the revaluation of the fair value of assets
- Tier 2 capital or Capital or Supplementary Capital: general reserves to cover loan losses, the Bank's assets estimated as good assets and
- Deductible items.

Risk-weighted assets are measured by means of hierarchy of four weights classified according to the nature of the assets and reflecting an estimate of associated credit, market and other risks, taking into consideration all eligible collateral or guarantees. Similar treatment is adopted for off-balance sheet exposures, with certain adjustments made in order reflect the volatility of potential losses.

The table below shows the structure of regulatory capital and capital adequacy indicators at 31 December 2015 and 31 December 2014, in accordance with local regulations (information on risk weighted assets is not audited), taken from the accounts submitted to the Agency for the periods then ended:

	2015 BAM '000	2014 BAM '000
Tier 1 capital		
Share capital	163,615	163,615
Reserves Intangible assets	(278)	(39)
Total Tier 1 capital	163,337	163,576
Tier 2 capital		-
General provision - Agency regulations Audited profit for the year	1,771	2,480
Total Tier 2 capital	1,771	2,480
Adjustment for shortfall in regulatory reserve	(3,999)	(7,010)
Net Capital	161,109	159,046
Risk weighted Assets * Other weighted Assets *	182,643 15,002	194,204 16,810
Total weighted risk	197,645	211,014
Capital adequacy ratio (%)	81.5%	75.4%

^{*} The risk weighted asset amounts in the table above were calculated in accordance with FBA regulations

Financial statements for the year ended 31 December 2015

Notes to financial statements (continued)

25 Financial risk management (continued)

25.5 Capital management (continued)

In accordance with the regulations of the Agency, the Decision on minimum standards for managing bank capital and capital protection adopted on 30 May 2014 ("Official Gazette of BiH" No. 46/14), audited profit for the period are included in the calculation of regulatory capital as of the day when the Audited financial statements are issued and approved by the shareholders of the Bank. In accordance with regulatory requirements in force at the date of the report of 31 December 2015, profit for the period was included in the calculation of regulatory capital if the audited financial statements were approved and adopted by the Supervisory Board prior to submission of the report to the Banking Agency. In the above calculation, audited profit for 2015 was included in the calculation of capital adequacy as at 31 December 2015.

26 Potential liabilites

On 31 December 2015 the total value of claims initiated against the Bank amounted to BAM 2,676 thousand: BAM 2,283 thousand relate to labor disputes, and BAM 393 thousand to other disputes against the bank.

For part of the labor dispute, the Bank concluded extrajudicial settlements by which the employees waive their claims, and the Bank undertakes to pay the employee's attorneys' fees incurred. Accordingly the Bank formed provisions in the amount of BAM 16 thousand. The provision regarding legal disputes for which the Bank's management estimate that will be lost, including provisions for reimbursement of lawyers' costs under the concluded agreements on extrajudicial settlement, amounts to BAM 38 thousand.

Given the uncertainty of different practices of the courts in making decisions on labor disputes, the Management is not able to estimate the outcome of the remaining cases, and thus have not formed provisions, except as stated above.

Assessment of the Management, regarding other claims against the Bank, is that they will not be lost.
